16th European Headache Congress

Moving to a headache-less future

7–10 December 2022

Call for abstracts

Deadline: 2 June 2022

Hybrid, Vienna and online

www.headache-congress.org

A new congress experience

The announcement to hold the EHC – European Headache Congress 2022 in Vienna, Austria provides completely new possibilities for all participants. As the European Headache Congress has always been a wide-ranging stage for scientists to present the latest topics in headache diseases, we would like to encourage everyone to use the possibility to present their scientific research to an international audience.

We want to make sure that the European Headache Congress 2022 is filled with the latest scientific findings, to provide the best possible treatment for patients suffering from headache, now, but also in future.

We look forward to your submissions and to the presentations of your work at EHC 2022 in December.

Be part of the first hybrid congress in the history of the EHF.

The new congress format gives you the opportunity to be on-site and still enjoy all the virtual benefits. If you missed a session, take the advantage of an extensive on demand offer.

This is what you can expect

On-site

- Scientific programme on-site from Friday–Sunday
- ePoster terminals and several stations for self-study
- Open stage within the industrial exhibition
- Industry presentations and space for cooperating societies and start-ups
- Meet your colleagues and friends in person
- Polls and questionnaires
- Interactive parts
- Social programme

Virtual elements

- Live broadcast of the plenary hall to the virtual congress platform
- All sessions available on demand
- Virtual congress platform
- ePosters available online during the whole congress and afterwards

Abstract submission

Would you like to present your latest scientific research to a broad international audience? Please do so! Take your chance and submit your contribution by **2 June 2022**. Visit www.headache-congress.org for more details and regularly updated information.

Abstracts submitted as oral have the chance to be presented in oral sessions, or even in a thematically relevant symposium. ePoster contributions will be displayed at terminals in the respective sessions. Additionally, the ePosters will be permanently available on all screens on-site as well as on the virtual platform on demand.

Abstract topics

Basic science, animal models in headache research	Idiopathic intracranial hypotension
Cervicogenic headache	Medication overuse headache
CGRP inhibitors in the clinic	Migraine
Cluster headache	Multidisciplinary clinical assessments
COVID and headache	Neuroimaging in headache disorders
Data science in research and digital medicine	Neuromodulation and nerve blocks
Epidemiology	Neuropeptides, channels in headache
Genetics genomics RNA	Oro-facial and temporomandibular disorders
Glymphatic system	Pathophysiology others than migraine and cluster
Guidelines in headache	Posttraumatic headache disorders
Headache, hormones and dietary	Secondary headaches
Headache in children and adolescents	Tension type headache
Headache in the elderly	Trigeminal neuralgia
Headache, thalamus and other brain nuclei	TRP channels and headache

If your abstract might not fit in one of the above named topics, please simply choose the topic „Others“ while your abstract submission. Our goal is to provide a versatile and varied programme.
